## DETAILED ACTION

### ***Election/Restrictions***

1. Applicant's election without traverse of claims 2 and 3 in Paper No. 4 is acknowledged.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 2-14 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01. The omitted structural cooperative relationships are: between elements (a)-(l).

### ***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 2-14 are rejected under 35 U.S.C. 102(b) as being anticipated by USP 4,837,390 (Reneau).

The Reneau patent discloses a **hyperbaric** organ preservation apparatus for preserving living organs. See the description of figure 1.

6. Claims 2,4,5,6, are rejected under 35 U.S.C. 102(b) as being anticipated by USP 5,356,771 (O'Dell).

The O'Dell patent discloses a combined perfusion and oxygenation organ preservation apparatus comprising means for providing hyperbaric oxygenation and temperature control. See description of figures 1-3a and column 2, lines 14- col.3.

7. Applicant is informed that amendments (changes) to the application must be executed in accordance with 37 C.F.R. 1.121. A copy of this rule is included in this action.

8. An examination of this application reveals that applicant is unfamiliar with patent prosecution procedure. While an inventor may prosecute the application, lack of skill in this field usually acts as a liability in affording the maximum protection for the invention disclosed. Applicant is advised to secure the services of a registered patent attorney or agent to prosecute the application, since the value of a patent is largely dependent upon skilled preparation and prosecution. The Office cannot aid in selecting an attorney or agent.

Applicant is advised of the availability of the publication "Attorneys and Agents Registered to Practice Before the U.S. Patent and Trademark Office." This publication is for sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.
